PROFESSIONAL SUMMARY

Pre-final-year B.Tech CSE undergraduate at IIITDM Jabalpur seeking an **AI Full-Stack Developer Internship**. Shipped **3+ full-stack AI applications** (React, Next.js, Node.js, PostgreSQL, MongoDB, AWS), including a production ML/OCR web app during OkCredit's Future Founders Internship (**1 of 66** finishers from **756 teams**) and an AI helper platform processing documents with RAG-based retrieval in **~2 minutes**. Merged **3+ open-source PRs** to Plone Volto and MDN Web Docs.

EDUCATION

Indian Institute of Information Technology, Design and Manufacturing Madhya Pradesh, India
B.Tech – Computer Science and Engineering; CGPA: 7.7/10.0 Aug 2024 – Aug 2028
◦ Coursework: OS, Data Structures & Algorithms, OOP, System Design, AI, Machine Learning, Computer Networks, DBMS, Cryptography

EXPERIENCE

Future Founders Intern – OkCredit Bengaluru, India (Remote)
Team of 3; selected from 756 teams nationwide, one of 66 to complete the 8-week programme May 2026 – Jul 2026
◦ *Tech Stack:* AI-powered OCR, Machine Learning, Cloud Deployment, WhatsApp API
◦ Conducted on-ground discovery with a stationery retailer in Sabour, Bihar; identified stockouts through concrete signals (e.g., items unordered for 2+ days) and a nightly manual bill-reconciliation bottleneck.
◦ Designed and shipped **Shop Mitra**, a cloud-deployed web application using AI-powered OCR to extract inventory data from photographed invoices and a machine-learning model to forecast stockout dates.
◦ Built colour-coded stock-risk alerts and a one-click WhatsApp reorder link to distributors, driving real, repeated adoption across multiple consecutive sessions; cleared 8 consecutive weekly project gates and earned a formal LOR from OkCredit's Co-Founder & CPO.

SKILLS SUMMARY

Languages: Python, C++, C, Java, JavaScript, TypeScript, PHP, SQL
Frontend & Backend: HTML, CSS, React, Redux, Tailwind CSS, Node.js, Express.js, Django, Next.js, REST APIs
Core CS: Data Structures & Algorithms, Object-Oriented Programming, System Design, Unit Testing
AI / Data Science: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Jupyter
Databases: MongoDB, MySQL, PostgreSQL
Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD
Tools & Practices: Git, Version Control, Postman, Agile/Scrum
Soft Skills: Leadership, Event Management, Technical Writing, Public Speaking

PROJECTS

AI Notes Generator | [Live Link](#) | [GitHub](#) Aug 2026
◦ *Tech Stack:* Next.js, TypeScript, Tailwind CSS, BullMQ, Redis, MongoDB, Gemini API
◦ Architected an AI study platform generating structured notes, 5–7 MCQs, and a summary flashcard per document using **RAG**-based retrieval on user-uploaded PDFs.
◦ Optimized the pipeline to process a 15-page PDF in **~2 minutes**; validated across **30+ test documents**, including real use by a peer for JEE exam preparation.
◦ Engineered asynchronous background processing with **BullMQ/Redis** for long-running AI workloads, with Clerk auth and real-time job progress tracking.

Peblo TV – Content & Publishing Platform (Assignment) | [Live Viewer](#) | [Live CMS](#) | [GitHub](#) Sep 2026
◦ *Tech Stack:* React, TypeScript, Tailwind CSS, FastAPI, SQLite, Docker
◦ Designed a full-stack kids content platform (Viewer App, CMS Studio, FastAPI backend) exposing **25+ REST endpoints** across 8 domain modules, managing a catalogue of **8 series and 24 localized episode variants** across 4 age tiers.
◦ Developed and implemented pre-publish validation checks and versioned catalogue rollback, reducing critical publishing errors by 45% and improving content deployment stability.
◦ Wrote **12 automated unit/integration tests (100% passing, Pytest)** covering validation, rollback, **RBAC**, and search; built over a 2-week cycle with 20+ structured Git commits.

ACHIEVEMENTS

Competitive Programming Profiles
◦ [Codeforces](#): 1105 (Newbie) | [CodeChef](#): 1423 (2 Star) | [LeetCode](#): 222+ solved, 49+ day streak

Open Source Contributions
◦ Merged **3 pull requests** across **Plone Volto** and **MDN Web Docs**, including a contextual floating toolbar for table row/column operations and a technical documentation fix; one contribution backported to the **18.x branch**.
